

Lash Lift/Perm Pre/Post Care

Pre Care

Any eye makeup, or remnants thereof will prevent a secure bond for the lash lift, and an inability to properly penetrate the lashes for a Lift. If you come to your appointment with debris on your eyelashes, it may result in sub-par results.

Do not curl your eyelashes or wear waterproof cosmetics for a minimum of 3 days prior to your service. Waterproof products are drying and leave a waxy barrier on the lashes regardless of how well they are washed.

Do not wear contact lenses to your appointment. Please remember to wear your glasses.

Avoid caffeinated beverages (coffee, tea, soda, energy drinks) before your appointment, as this makes it quite difficult for the artist to do their job. Enjoy the opportunity to take a few moments of your day to comfortably relax and be pampered.

Do not spray tan 48 hours before your lash appointment.

Post Care

Avoid using steam rooms, saunas or sunbeds for at least 48 hours post lash lift/perm. (We also advise not to get your lashes excessively wet for the first 24 hours.)

Be gentle around your lashes try not to rub them when washing your face and always pat dry. Remember to brush them upwards after washing with a lash wand.

It is not advised for you to apply makeup or any self-tanning products for 48 hours following on from your treatment

Sleep on your back or side & keep lashes off pillow. Your lashes are prone to kinks during first 24 hours.

Want to keep your lash lift/perm fresh? Remember to get your next lash lift/perm appointment booked in for 2-4 weeks time.
