

Facial Pre/Post Care

Pre Care

Do not tweeze, wax, laser, electrolysis, or any other hair removal in the bulk of the brow, 1 week prior to your appointment.

It is important to stay out the sun (artificial or not) for a minimum of 72 hours prior to service.

Avoid microdermabrasion, and chemical peeling services 2 weeks prior to your facial service.

Discontinue retinol, AHA, BHA, vitamin-c serums, etc or any other prescription topicals for your skin 72 hours prior to your service.

Discontinue all use of antibiotics two weeks prior to your peeling service.

Post Care

Drink lots of water! It can help your body through the detox process by flushing your system and maintain that beautiful post-facial glow.

No scrubs, peels, waxing, exfoliating, or aggressive brushes for 3 days. Only use a gentle cleanser and apply moisturizer at least twice daily for a minimum of 3 days post treatment, then continue your normal skin routine.

Do not apply any acid or retinol products for at least 72 hours following peeling service.

Please don't pick! Messing with your face post-facial can cause irritation and sometimes scarring. Let that all come out on its own.

It is not advised for you to apply makeup or any self-tanning products for at 24 hours. Your pores are wide open and you clog your pores again. Let your skin settle naturally.

Want to keep your skin fresh? Remember to get your next facial appointment booked in for 4-6 weeks time.
